Industries Served

- Assisted Living Centers
- Manufacturing Facilities
- Dressing Room Paging
- Hardware stores
- Doctor's offices
- Restaurant back door monitoring

Also works with our
alpha numeric
pager

Specifications

Frequency: 467.750 MHz

Output Power: .1 watt

Range: .25 miles

Modulation: AM, FM, On/Off Keying

Contacts: Programmable Normally Open, Normally Closed, Analog Inputs

Analog Limits: 5V, 100mV steps, rising/falling threshold

Current Consumption: <10uA standby, 125mA transmitting

Input Voltage: 8-16V DC
