

T7450 Trinity

Coaster Call III

Vibe only and
Numeric Pager

The Informant

FAMILY PAGING

With the vibe only, numeric and the original Coaster Call paging system from Long Range Systems, families can be reached throughout the hospital. Our easy to use systems are allowing facilities to easily adhere to proposed HIPAA regulations requiring patient confidentiality. Applications include: outpatient, emergency room, admissions, ICU, maternity and many others. Loved ones are no longer confined to the waiting room where minutes seem like hours. Our silent paging systems can contribute significantly to relieving some of the stress caused when someone you love is in the hospital. We also offer the telephone interconnect system, which allows families to be paged from multiple locations.

Features and Benefits

- Patient Confidentiality - allows families and patients to achieve privacy.
- Overhead paging is eliminated resulting in a quieter atmosphere.
- Families can be notified immediately optimizing staff productivity.
- Text Messages - 65 canned messages available on numeric pagers.
- Anti-theft - each pager has a built-in feature that allows it to be located; therefore, minimizing pager loss.
- Trinity System can even page families on their own cell phone with a pre-recorded message.

STAFF PAGING

Staff paging systems will allow every employee to spend more time with patients, therefore, improving relationships and confidence. Doctors and staff can be paged with different codes letting them know a variety of information such as; when lab results are in, when they have a phone call, and where the emergency is.

PATIENT SURVEYS

Healthcare facilities spend countless dollars on obtaining minimal feedback through a variety of survey methods. The electronic survey device developed by LRS allows hospitals to maximize survey responses, obtain accurate, timely feedback and maintain allotted budgets.

Features and Benefits

- High Response Rate - the normal 1% response rate is drastically increased
- Monthly cost - current survey methods require monthly fees. With the electronic survey device, monthly fees are eliminated
- Data Retrieval - data can be gathered daily, weekly, monthly or any time to meet your requirements
- Flexible - surveys are fully customizable and may be changed when you want, how you want
